Summary

Results-driven Full-Stack Software Engineer specializing in scalable enterprise SaaS, multi-vendor marketplaces, and ERP/CRM systems. Expert in modern stacks (PHP, Laravel, React.js, Next.js) and clean architecture (MVC, Repository). Adept at engineering complex business logic, secure RESTful APIs, and intelligent automations (n8n, AWS S3) to optimize performance and mentor tech teams.

Experience

OrbScope Academy

Back-End Instructor

- Mentored 50+ students in building and deploying Dockerized PHP/Laravel APIs, covering OOP/MVC principles and complex third-party integrations.

Route Academy

Back-End Instructor

- Guided students in building job-ready projects, applying industry best practices in Laravel and Docker.

Elevate Tech

Back-End Developer

- Engineered the back-end and database for the "Sella" app, implementing automated reminders, a robust notification system, and secure Google/Apple authentication.

Web Rack Software Company

Full Stack Developer

- Architected scalable full-stack applications and secure RESTful APIs using PHP, Laravel, MySQL, and React.js, while mentoring junior developers.
- Built multi-tenant SaaS ERPs (e.g., "OfficeHub") and tailored CRMs, streamlining enterprise workflows, sales networks, and resource planning.
- Engineered real-time tracking platforms and advanced asset management systems (e.g., "Pluto"), featuring live geolocation and complex operational logistics.

e-RAMO for Digital Solutions

Software Engineer

- Drove full-stack development and feature expansion for diverse enterprise projects, optimizing existing database structures and building secure RESTful APIs to seamlessly connect front-end and back-end operations.
- Architected complex multi-vendor ecosystems (including real estate and service booking platforms), integrating advanced features like dynamic space reservation, shared geolocation mapping, and tailored CRMs.
- Implemented mission-critical integrations and data operations, including seamless payment gateways, real-time web socket notifications, and comprehensive analytical reporting modules for business intelligence.
- Automated complex business processes and data pipelines using n8n, effectively managing dynamic webhooks and seamlessly integrating AI models to drive advanced analytics and intelligent system operations.
- Engineered complex business logic for subscription lifecycles, add-on services, and accounting workflows, alongside managing scalable media uploads and updates via AWS S3.

Projects

Amtalek (Real Estate Multi-Vendor Platform)

- Technologies: PHP, Laravel, MySQL, React.js, Next.js, RESTful APIs
- A comprehensive multi-vendor real estate SaaS platform. Engineered robust RESTful APIs to serve mobile applications and developed complex backend logic managing subscription packages, add-on services, automated invoicing, and dynamic user roles (Brokers, Developers, Users).

Bnaia (Finishing & E-Commerce Marketplace)

- Technologies: PHP, Laravel, MySQL, React.js, Next.js, Payment Gateways
- A specialized multi-vendor marketplace for home finishing materials and appliances. Architected complex product catalogs featuring dynamic SKUs and multi-level product variants (size, color, brand attributes), alongside integrating secure payment gateways for seamless transactions.

Office Hub (Multi-Tenant SaaS ERP & CRM)

- Technologies: PHP, Laravel, MySQL, Tenancy for Laravel
- A comprehensive multi-tenant SaaS platform for enterprise management. It features a robust HR and attendance module with dynamic shifts, a dynamic CRM with sales pipelines, and a Kanban-based task management system equipped with internal messaging and auto-calculated performance analytics.

Nutrivet

- Technologies : PHP , Laravel , Mysql , PWA (Service Workers & IndexedDB)
- A web-based CRM and field sales tracking system for a veterinary company. Features full offline capabilities (PWA), enabling representatives to manage client companies, schedule appointments, and log visit reports with geolocation tracking, syncing data seamlessly once online.

Skills

🔗 Core Competencies & Architecture

SaaS & Multi-vendor Architecture, Real-time Data Processing, Subscription & Accounting Logic, Object-Oriented Programming (OOP), MVC & Repository Patterns

🔗 Programming Languages

PHP, JavaScript (ES6+), TypeScript, Python, C++

🔗 Front-End Development

HTML5/CSS3, Tailwind CSS, Sass, React.js, Next.js, PWA (Service Workers)

🔗 Back-End Development

PHP, Laravel, Mysql, Database Design & Optimization, RESTful APIs & Webhooks, Payment Gateway Integration

🔗 Tools, Systems & DevOps

Git & GitHub, Postman & Apidog, AWS S3, ERP & CRM System Integrations, n8n (Workflow Automation & AI Integration), Docker

Education

New Cairo Academy
Computer Science

Bachelor
2020 - 2024

Languages

Arabic
Native

English
Professional Working Proficiency
